 MACHINES

BENEFITS OF USING OPTICARE PORRIDGE

- Opticare Porridge is very palatable for young piglets, and encourages feed intake.
- Only highly digestible ingredients are used in the feed.
- Ingredients with high waterabsorbing capacities are used to assist in producing stable liquid mixes.
- A very soluble product, suitable for use in liquid feed or milk mixers.
- Opticare Porridge is developed to support and maintain intestinal health.
- The product can be mixed with Opticare Milk to support smaller piglets.

MIXING INSTRUCTIONS

- Opticare Porridge can be fed to piglets using porridge machines.
- Mix 1 kg Opticare Porridge with 2.2 litres of warm water.
- The product should be mixed with Opticare Milk for lighter piglets.
- It is advised to start feeding Opticare Porridge to piglets when they are heavier than 5.5 kg.
