

# OPTICARE

Product information  
**SwiNco Opticare PreShake**  
 (code: 2107)

## ABOUT OPTICARE PRESHAKE

- Opticare PreShake is a liquid pre-starter connecting Opticare Milk with a solid starter feed.
- The product is a fine powder with a creamy white colour and a typical milk smell. It is packed in 25 kg bags.
- It is best to use the product within 6 months of the production date.
- Store in a clean, cool and dry place.
- To maintain freshness, keep any partially-used bag closed.
- This product does **not contain blood plasma**.
- The product is stable in solution for up to five days.

THE LIQUID LINK BETWEEN  
MILK AND DRY FEED

## BENEFITS OF USING OPTICARE PRESHAKE

- Smoother, more fluent weaning process because of the better connection between milk and dry feed.
- A low cost alternative to feeding milk for the entire lactation period.
- A good product to educate the pigs gut to digest vegetable protein and starch.
- Stimulates intestinal development due to improved dry matter intake before weaning.
- Heavier, healthier and more uniform piglets at weaning.
- Product dissolves easily in water and is very tasty.
- High solubility with minimal fat separation and protein flocculation.
- The product is specially developed for all artificial rearing systems –
  - Rescue decks
  - Farrowing house cups
  - Round creep feeders

## MIXING INSTRUCTIONS

- Mix 200-250 grams of product with 1 litre of warm water.
- Water needs to be at 55 degrees Celsius at mixing.
- Feed after Opticare Milk for 10 days of age until 1 week before weaning.
- Use only fresh clean water for mixing milk.
- Prepare fresh product twice per day.
